 - Enable natural language queries, summarization, insights
-

Case Studies

1. Barbecue Cell Restaurant Chatbot

Role: AI Chatbot Developer

Platform: Web Chatbot

Challenge: Manual reservation handling and menu queries were causing delays.

Solution: - Built a conversational chatbot for reservations and menu assistance - Buffet pricing logic based on weekdays - Personalized reservation form and unique code confirmation

Impact: - 90% automation in customer queries - Smoother reservation workflow with error-free entries

2. Aviara Connect Intelligence Hub

Client: Aviara Labs

Role: AI Developer & Integration Architect

Link: aviaralabs.com/aviara-connect

Challenge: Disconnected CRMs, investment platforms, and compliance systems made it hard to track financial data.

Solution: - Built an AI agent that connects all data sources - Natural language search, compliance monitoring, and portfolio insights

Outcome: - 70% faster data access - 90% improved compliance accuracy - Increased trust & usability for financial advisors

3. Sales AI Automation via HubSpot & Clay

Role: AI Sales Engineer

Published: April 7, 2025

Solution Highlights: - AI-generated lead summaries - Opportunity analysis using AI - Auto-drafted support emails - Integrated with HubSpot, Clay, and Apollo.io
